

LEXILE BOOKS IN THE LIBRARY

Lexile: Matching Readers to Text

Find Books at the Right Level

Using Lexiles helps students find books of interest at their appropriate reading level and find the right books for engaging students and encouraging reading. The Lexile Framework is an indispensable part of our library, helping teachers and students make informed choices when choosing texts.

Lexile Measures

Lexile measures are completed within the classroom and assist in recommending materials that will improve student reading skills and take the guesswork out of matching readers with appropriate books and articles. The Lexile Framework is supported by many products, tools and services. Using a student's Lexile reader measure as a starting point makes it easy to find books that provide the just-right amount of challenge to advance their reading skill development.

Finding a Lexile Book in the Library

It's easy to find books that are right for the student, just look for the coloured sticker on the spine.

Lexile Colour Chart

○ Misc	● 600 - 699
